

Send us retailers. Earn 5% of every piece.

Jeweliful is print-on-demand jewelry. Retailers sell personalized pieces under their own brand; we make each piece to order and ship it from the US.

What your retailers get

- A free account. No monthly fee, no minimums, no inventory.
- They pay after their customer pays them.
- Their logo on the pouch and the Thank-you card.
- Every piece made to order and shipped from the US.
- Shopify connects directly. Etsy is assisted.

The arithmetic, on our prices

One order of one piece <i>\$20 base price × 5%</i>	\$1.00
---	--------

One retailer, for a day of 1 to 2 orders <i>\$1.00 × 1 to 2 orders</i>	\$1–\$2
---	---------

100 retailers you referred, for a month <i>\$1–\$2 × 100 retailers × 30 days</i>	\$3,000–\$6,000
---	-----------------

These are our prices multiplied out, not a promise of earnings. Every retailer sells differently, and some sell nothing. The only money paid is 5% of the pieces your retailers actually order and pay for.

The terms

- 5% of the pieces on every order a retailer you referred pays for, after any first-orders discount. Shipping and Studio tokens never count.
- For each retailer's first 12 months, from the day they sign up.
- A 90-day cookie on your link.
- Paid monthly through PartnerStack. No cap on retailers or commission.
- Cancelled and refunded orders are reversed. You cannot refer yourself.
